USER MANUAL | HOW TO USE

STEP 1 **Select the variant**

Make sure the variant (wattage) matches the compatible luminaire before installing.

STEP 2 **Turn off the power**

Switch off the mains supply before starting any work on the luminaire. Installation must be done by a professional electrician only (high voltage).

STEP 3 **Check for damage**

Use the accessory out of its package and check it for damage caused by transport. If any damage is visible, do not install or use it.

STEP 4 **Connect the driver**

The electrical connection of the emergency driver must follow the wiring diagram supplied with the driver (not included in the documents we received). Installation by a professional electrician only.

SAFETY NOTICE:

- Installation must be done by a professional electrician only; non-professionals must not install, disassemble or connect wires (high voltage).
- If the power cable or the housing is damaged, the product must not be used.
- Use the light out of its package and check it for transport damage before installation.
- Never cover the luminaire and keep it away from open flames and external heat sources.
- Avoid looking directly into the LED beam, especially for extended periods. Do not shine the light in anyone's eyes.
- Maintenance by trained professionals only. Unauthorised disassembly may void the after-sales service.
- After its service life the product needs an inspection or special treatment for disposal.
